Description

Zinc Bacitracin is a mixture of high-molecular-weight polypeptides (bacitracin A, B, C, and several minor components). Zinc Bacitracin occurs as a yellowish gray-brown to brown powder. It has characteristic odor. It is freely soluble in dilute hydrochloric acid, water, pyridine, and menthol. Bacitracin has antibacterial effect on Gram-negative bacteria, actinomycetes, and leptospirae, and strong antibacterial effect on Gram-positive bacteria. It has growth-promoting effect on chickens (including broilers), pigs, and cattle.

In 2018, Lifecome Biochemistry is considered to be the global market leader with a 26% share of production. Top 5 manufacturers occupied about 74% market in 2018.

China was the largest production region in the past few years, with a proportion of 65%.

Asia Pacific was the largest consumption region, which occupied 1/3 market during the past few years.
