### Description

Tire changers are machine used to help tire technicians dismount and mount tires with automobile wheels. After the wheel and tire assembly are removed from the automobile, the tire changer has all the components necessary to remove and replace the tire from the wheel. Different tire changers allow technicians to replace tires on automobiles, motorcycles and heavy-duty trucks. New tire and wheel technology has improved certain tire changers to be able to change a low profile tire or a run-flat tire.

Global Tire Changers key players include Worldbright, DALI, Corghi, SNAP-ON, Bosch, etc. Global top five manufacturers hold a share over 25%.

China is the largest market, with a share about 55%, followed by Germany, and Italy, both have a share about 25 percent.

In terms of product, 15-24 inch is the largest segment, with a share over 75%. And in terms of application, the largest application is Truck Tire Changer, followed by Car Tire Changer, etc.
