Description

Tire Protection Chain is a close mesh which is fitted over the face and the sidewalls of the tire to form a barrier against damaging materials in extreme applications. Its self-cleaning feature prevents the tread mesh becoming filled and clogged, contributing to achieving the best possible road-holding and traction.

The major players in global Tire Protection Chain market include Rud, Pewag, Las Zirh, etc. The top 3 players occupy about 50% shares of the global market. Asia-Pacific and Europe are main markets, they occupy about 65% of the global market. Link-Ring-System is the main type, with a share about 65%. Quarrying is the main application, which holds a share about 30%.
