### Description

Diesel engine, any internal-combustion engine in which air is compressed to a sufficiently high temperature to ignite diesel fuel injected into the cylinder, where combustion and expansion actuate a piston. It converts the chemical energy stored in the fuel into mechanical energy, which can be used to power freight trucks, large tractors, locomotives, and marine vessels. A limited number of automobiles also are diesel-powered, as are some electric-power generator sets.

Global Vehicle Diesel Engine key players include Volkswagen, Renault, PSA, Ford, etc. Global top four manufacturers hold a share about 25%.

Europe is the largest market, with a share over 60%, followed by North America and China, both have a share over 25 percent.

In terms of product, 4 Cylinder is the largest segment, with a share about 55%. And in terms of application, the largest application is Commercial Vehicle, followed by Passenger Vehicle.

### Report Scope

This report quantifies the global Vehicle Diesel Engine market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Vehicle Diesel Engine.

### Key Companies & Market Share Insights
