Description

Dicalcium phosphate (DCP) is a dibasic calcium phosphate formed by a reactive combination of calcium oxide and phosphoric acid. It is a type of dibasic calcium phosphate which is normally found in sources such as cereals, noodles, enriched flour, chicken feed, and some types of dog snacks. It is usually found in dehydrate form but may be converted to the anhydrous form using thermal means. It has a variety of uses in many fields. Global Dicalcium Phosphate key players include PotashCorp, OCP, Anglo American, Ecophos, TIMAB, etc. Global top five manufacturers hold a share over 15%. China is the largest market, with a share about 55%, followed by Europe, and North America, both have a share over 25 percent. In terms of product, Feed Grade is the largest segment, with a share over 75%. And in terms of application, the largest application is Animal Feed Industry, followed by Food Industry, etc.

Report Scope

This report quantifies the global Dicalcium Phosphate market in revenue (US\$ million) and, where applicable, sales volume (K t), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K t) and concentration ratios (CR5/CR10). The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Dicalcium Phosphate.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
