Description

Gasification is a process that converts organic carbonaceous feedstocks into carbon monoxide, carbon dioxide, and hydrogen by reacting the feedstock at high temperatures (>700°C, 1290°F), without combustion, with a controlled amount of oxygen and/or steam. The Gasification industry can be broken down into several segments, Coal Gasification, Biomass Gasification, etc. Across the world, the major players cover Air Liquide, Siemens, KBR, etc.

Global Gasification key players include Air Liquide, Air Products (Formerly GE), Synthesis Energy Systems, Shell, Siemens, etc. Global top five players hold a share over 20%. Asia-Pacific is the largest market, with a share about 70%, followed by North America and Europe, both have a share about 20 percent.

Report Scope

This report quantifies the global Gasification market in terms of revenue (US\$ million) and, where applicable, service volume (Kiloton), using 2024 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of service Types and end-use Applications, harmonizes provider attribution, and delivers comparable time series by company, Type, Application, and region or country, including indicative price bands (US\$/Kiloton) and concentration ratios (CR5/CR10). Outputs are intended to support service design, budgeting, capacity planning, and benchmarking for providers, platforms, channel partners, and investors; the report also reviews technology shifts and notable service innovations relevant to Gasification.

Key Companies & Market Share Insights

This section profiles leading service providers with 2021–2025 results and a 2026–2032 outlook—covering revenue, market share, price bands, service portfolio and client mix, regional and channel mix, and key developments (M&A, network expansion, certifications). It also provides global revenue, average price, and—where applicable—volume metrics by provider, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
