Description

Insulated Metal Panels (IMPs) are lightweight composite exterior wall and roof panels with metal skins and an insulating foam core. These panels have superior insulating properties and their outstanding spanning capabilities and one-pass installation makes them quick to install, saving costs compared to other wall assemblies. IMPs are available in a wide variety of colors, widths, profiles and finishes, enabling virtually any aesthetic desired for walls and roofs.

Global Insulated Metal Panels key players include Kingspan Panel, Metl-Span, Huntsman, etc. Global top three manufacturers hold a share over 70%.

Europe is the largest production area, with a share about 50%, followed by North America and Asia, both have a share over 35 percent.

In terms of product, Insulated Metal Wall Panels is the largest segment, with a share over 65%. And in terms of application, the largest application is Commercial/Industrial, followed by Architectural, etc.

Report Scope

This report quantifies the global Insulated Metal Panels market in revenue (US\$ million) and, where applicable, sales volume (M Sqm), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.
