Description

L-phenylalanine is one of the essential amino acids in human body, which plays an important role in human metabolism. Widely used in medicine, food and chemical industry. White crystalline or crystalline powder solid at room temperature, decompressive sublimation, soluble in water, insoluble in methanol, ethanol, ether.

In the global L-phenylalanine industry, Japan's Ajinomoto, Korea Daesang etc. are leaders in this industry. However, the monopoly phenomenon of the L-phenylalanine industry is not obvious. Through continuous technological innovation, Chinese companies have broken the monopoly of the original industry giants on the L-phenylalanine market. Amino acid technology has gradually matured and is not innovative in China. In the international market, American Newt and Dutch DSM exited the industry in 2014 and 2006, respectively.

The report provides an overview of the global L-Phenylalanine (L-Phe) market in terms of capacity, output, revenue, and price, analyzing global market trends using historical revenue and sales data for 2021-2025, estimates for 2026, and projected CAGRs through 2032.

The study covers key producers of L-Phenylalanine (L-Phe) and consumption patterns in major regions and countries, assesses future market potential, and highlights priority regions and countries for segmenting the market into sub-sectors, with country-specific market value data for the U.S., Canada, Mexico, Brazil, China, Japan, South Korea, Southeast Asia, India, Germany, the U.K., Italy, the Middle East, Africa, and other countries.
