Description

Plastic bottle recycling refers to the process of recovering waste or scrap plastic bottle and reprocessing the materials into functional and useful products. The goal of recycling plastic bottle is to reduce high rates of plastic pollution while putting less pressure on virgin materials to produce brand new plastic products. This approach helps to conserve resources and diverts plastics from landfills or unintended destinations such as oceans.

In 2019, Europe is the largest plastic bottle recycling production area, accounting for about 47%, followed by North America, accounting for about 28%.

Leading suppliers in the worldwide are UltePET, CarbonLITE, Veolia Group, etc. which takes a combined share of less than 20% in 2019.

Report Scope

This report quantifies the global Plastic Bottle Recycling market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Plastic Bottle Recycling.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications).
