### Description

Polyaluminium chloride (PAC) is manufactured in both liquid and powder form. The product is used in deodorants and antiperspirants, as a flocculant in water purification, in treatment of drinking / potable water, wastewater treatment and paper sizing.

In this report, poly aluminium chloride is classified into liquid and powder type. All the poly aluminium chloride products are converted into 30% Al<sub>2</sub>O<sub>3</sub> content.

The PAC market is highly fragmented and according to LPI analysts there are nearly 1,000 PAC manufacturers worldwide. In most markets, local players occupy a major market share. Kemira, Feralco Group and Venator are the main players in the European market. Jianheng Industry, PT Lautan Luas Tbk and Taki Chemical are leaders in the Asia Pacific market. Kemira, USALCO and GEO are the main players in the US market.

### Report Scope

This report quantifies the global Poly Aluminium Chloride (PAC) market in revenue (US\$ million) and, where applicable, sales volume (kt), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/kt) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Poly Aluminium Chloride (PAC).

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
