Description

Polymer Emulsions are monomers dissolved in water. They are also known as waterborne solvent because of their high water content. They are one of the fastest growing categories of specialty chemicals in the world. Polymer Emulsions have superior usability and safety standards. Polymer emulsions also have better recyclability and lifespan when compared to solvent-borne polymers.

In this report, the polymer emulsion market is segmented on the basis of types into acrylics, vinyl acetate polymer, SB Latex, polyurethane dispersion, and others.

The top 5 key players of the global Polymer Emulsions include BASF, Dow, Trinseo(Styron), Akzonobel and Wacker, with about 33% market shares. Geographically, Europe is the largest consumption place, with a consumption market share nearly 29%. Following Europe, North America is the second largest consumption place with the consumption market share of 22%.

Report Scope

This report quantifies the global Polymer Emulsions market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Polymer Emulsions.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
