Description

Polyphenylene Oxide also known as PPO or PPE. While modified polyphenylene oxide also known as MPPO or MPPE. PPO, Polyphenylene Oxide is a tough, stiff material with high glass transition temperature and high melt point giving a high heat resistance. The material also has outstanding electrical properties and resistance to acids and bases.

At high temperatures PPO maintains its good load bearing characteristics and dimensional stability. The material also has excellent dielectric properties and may be rated as self-extinguishing and non-dripping. It is mainly used as blend with polystyrene, high impact styrene-butadiene copolymer or polyamide.

The market of PPE resin is highly concentrated with four players dominate the market, which are SABIC(GE), Asahi Kasei Chemicals, Mitsubishi Chemicals and Bluestar. SABIC(GE) is the largest supplier of PPE resin with a global market share of about 54% in 2019.

As for consumption, Asia-Pacific, North America and Europe are the major consumers of PPE. The largest consumption area of Polyphenylene Ether is Automotive, which accounted for about 29% of world consumption. Domestic Appliances and Electronic Components are also important application of Polyphenylene Ether which accounted for about 21% and about 23% of world market in 2019 separately.
