Description

Post-consumer resin (PCR) includes consumer packaging items such as plastic film, bottles, milk jugs, buckets, and also industrial packaging items such as IBC totes and poly drums. These items can be reprocessed into recycled plastic that’s used to make new products.

The major players in global Post Consumer Resin (PCR) market include Plastipak Holdings, MBA Polymers, Longfu Recycling Energy Sciencetech, etc. The market concentration rate is low, and the top 3 players occupy about 1% shares of the global market. Asia-Pacific is the main market, which occupies about 60% of the global market. PET and HDPE are main types, with a share about 65%. Packaging and Consumer Goods are main applications, which hold a share about 30%.

Report Scope

This report quantifies the global Post Consumer Resin (PCR) market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Post Consumer Resin (PCR).

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
