Description

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The main difference between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form. The coating is applied electrostatically and is then cured under heat to allow it to flow and form a “skin”. The powder may be a thermoplastic or a thermoset polymer. It is usually used to create a hard finish that is tougher than conventional paint.

The main global Powder Coatings manufactures include Akzonobel, Sherwin-Williams, PPG Industries, Axalta Coating Systems, Arsonsisi, etc. The top five Powder Coatings manufactures account for approximately 24% of the total global market. Asia-Pacific is the largest consumer market for Powder Coatings, accounting for about 75%, followed by Europe and North America. In terms of product, Thermoset Powder Coating is the largest segment, with a share about 75%. And in terms of application, the largest application is Indoor Application, followed by Outdoor/Architectural Application.

Report Scope

This report quantifies the global Powder Coatings market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Powder Coatings.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
