### Description

Precious metals mainly refer to 8 metal elements such as gold, silver and platinum group metals (ruthenium, rhodium, palladium, osmium, iridium, platinum). Most of these metals have beautiful colors and strong chemical stability. Under normal conditions, they are not easy to chemically react with other chemicals. From a regional perspective, the Chinese market is changing rapidly, and the global share is expected to reach 16.32% in 2026.

In terms of product type and technology, gold occupies a large share of the market—nearly 80% in 2019. Platinum group metals are listed as strategic materials by many countries, it is expected to grow rapidly. From the perspective of product market application, the consumer sector occupies most of the product application market. The consumer sector accounted for 52.91% of the market share in 2019.

Major global manufacturers include: Newmont Corporation, Barrick, Nornikel, Anglo-American etc. It is expected that industry competition will become more intense in the next few years.
