### Description

Propylene oxide is an organic compound with the molecular formula  $\text{CH}_3\text{CHCH}_2\text{O}$ . This colourless volatile liquid with an odour resembling ether, is produced on a large scale industrially. Its major application is its use for the production of polyether polyols for use in making polyurethane plastics.

In China, Propylene Oxide key players include DowDuPont, Lyondellbasell, Shell, Huntsman, etc.

In terms of product, Chlorohydrin Process is the largest segment, with a share over 55%. And in terms of application, the largest application is Polyether polyols, followed by Propylene glycols, Propylene glycol ethers, etc.

### Report Scope

This report quantifies the global Propylene Oxide market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Propylene Oxide.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
