### Description

Serpentinite is a metamorphic rock that is mostly composed of serpentine group minerals. Serpentine group minerals antigorite, lizardite, and chrysotile are produced by the hydrous alteration of ultramafic rocks. It is widely used in fertilizer, refractory, solvent for metallurgy, building materials etc.

China is the largest Serpentinite market with about 74% market share. Brazil is follower, accounting for about 11% market share.

The key players are Jiacheng, Huixiang, Baoxin, Liangshuo, Panda, Xinyuan, Honfoo, Pedras Congonhas, Southland Serpentine Ltd, Dundas Extended Minerals etc. Top 3 companies occupied about 47% market share.

### Report Scope

This report quantifies the global Serpentinite market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Serpentinite.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
