### Description

Silica fume, also known as micro silica, is an ultrafine powder collected as a by-product of the silicon and ferrosilicon alloy production. Silica fume is an ultrafine material with spherical particles less than  $\mu\text{m}$  in diameter, the average being about  $0.15 \mu\text{m}$ . So it also called the ultrafine silica fume.

Ferroglobe and Elkem(Blue Star) are the top 2 of Silicafumes, with about 30% market shares.

### Report Scope

This report quantifies the global Silicafumes market in revenue (US\$ million) and, where applicable, sales volume (kt), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/kt) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Silicafumes.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
