Description

Silicon carbide ceramics are mainly use silicon carbide as raw materials. Silicon Carbide has properties remarkably similar to those of diamond – it is one of the lightest, hardest, and strongest technical ceramic materials and has exceptional thermal conductivity, resistance to acids, and low thermal expansion. Silicon Carbide is an excellent material to use when physical wear is an important consideration because it exhibits good erosion and abrasive resistance, making it useful in a variety of applications such as spray nozzles, shot blast nozzles and cyclone components..

The consumption of silicon carbide ceramics mainly concentrates in North America, Europe and Asia-Pacific. Asia-Pacific is the largest consumer, which accounted for about 2/5 in 2019. Europe and North America are the followers, with the share of nearly 29% and 24% respectively.

Saint Gobain, Ceramtec, 3M, IBIDEN, Kyocera are the leading manufacturers of the world, these companies occupied 45% of the market in 2019.

Among various applications, demand from machinery manufacturing accounts for the largest share with about 31% in 2019 globally.

Reaction Bonded Silicon Carbide is the major process in manufacturing of silicon carbide ceramics, which takes share of about 58% of global market in 2019.

Report Scope

This report quantifies the global Silicon Carbide Ceramics market in revenue (US\$ million) and, where applicable, sales volume (MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Silicon Carbide Ceramics.
