Description

The palmitic acid in human milk is positioned in a very unique way to the second (middle) position of the glycerol back bone also known as sn-2 position (figure 2). In human milk, approximately 70-75% of the palmitic acids is esterified to the sn2 position of the triglyceride (sn2 palmitate). In contrast, vegetable oils only have about 8-10% of their palmitic acid attached to sn2. This special preferential positioning is even more significant knowing that it is conserved in all women, regardless of their ethnic origin or nutrition. That's Sn-2 Palmitate.

Global Sn-2 Palmitate key players include Advanced Lipids, Bunge Lodgers Crokiaan, Zhejiang Beijia.

Europe is the largest market, with a share about 55%, followed by Americas, and APAC, both have a share nearly 45 percent.

In terms of application, the largest application is Infant Formula(6-12 Months), followed by Infant Formula(0-6 Months), Infant Formula(12-36 Months).

Report Scope

This report quantifies the global Sn-2 Palmitate market in revenue (US\$ million) and, where applicable, sales volume (MT), using 2025 as the base year and providing annual historical and forecast data for 2021-2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Sn-2 Palmitate.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021-2025 results with a 2026-2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
