### Description

Sodium silicate is the generic name for a series of compounds derived from soluble sodium silicate glasses. They are water solutions of sodium oxide (Na<sub>2</sub>O) and silicon dioxide (SiO<sub>2</sub>) combined in various ratios, varying the proportions of SiO<sub>2</sub> to Na<sub>2</sub>O and the solids content results in solutions with differing properties that have many diversified industrial applications.

China is the largest production market with about 45% market share. North America and Europe are follower, together accounting for about 33% market share.

The key players are PQ Corporation, OxyChem, Shandong Laizhou Welfare Sodium Silicate and PPG Industries etc. Top 3 companies occupied about 35% market share.

### Report Scope

This report quantifies the global Sodium Silicate market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Sodium Silicate.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
