Description

Magnetic materials are important functional materials with wide application and various varieties. According to the application types, magnetic materials can be divided into soft magnetic materials and permanent magnetic materials. Soft magnetic material is a kind of magnetic material with low coercivity and high permeability. It is easy to magnetize and demagnetize. Its main function is to transfer and transmit electromagnetic energy, which is widely used in various power conversion equipment. Soft magnetic materials mainly include metal soft magnetic materials, ferrite soft magnetic materials and other soft magnetic materials.

Global Soft Magnetic Materials key players include TDK, DMEGC, VACUUMSCHMELZE, MAGNETICS, TDG, etc. Global top five players hold a share about 20%.

China is the largest market, with a share about 60%, followed by Taiwan, China and Japan, having a total share about 20 percent.

In terms of product, Soft Ferrite Materials is the largest segment, with a share about 80%. And in terms of application, the largest application is Communication, followed by Home Appliances and Consumer Electronics, Automotive, Solar Photovoltaic and Green Lights.

Report Scope

This report quantifies the global Soft Magnetic Materials market in revenue (US\$ million) and, where applicable, sales volume (Ton), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Ton) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Soft Magnetic Materials.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
