### Description

Solder Resist Ink (Solder mask) is a lacquer-like layer of polymer that provides a permanent protective coating for the copper traces of a printed circuit board (PCB) and prevents solder from bridging between conductors, thereby preventing short circuits. And also, the biggest advantage you get with solder mask is that soldering gets much easier, as solder doesn't spread everywhere and gets confined to the pads, making things much easier and reliable. Created primarily to facilitate wave soldering, it was well used in mass assembly. Green is its traditional color but now many colors are available.

The global Solder Resist Ink consumption market has been segmented into North America, Europe, Asia-Pacific, South America and Middle East & Africa. The Asia-Pacific held the largest share in the global market, its consumption of global market exceeds 86% % in 2019.

The leading manufactures mainly are TAIYO, Nan Ya Plastics, TAMURA, Ajinomoto Fine-Techno, Shenzhen Rongda, Jiangsu Kuangshun, Showa Denko, Coants Electronic, HUNTSMAN, etc. TAIYO is the largest manufacture and its revenue market share exceeds 50% in 2019.

### Report Scope

This report quantifies the global Solder Resist Ink market in revenue (US\$ million) and, where applicable, sales volume (MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.
