Description

This report studies the Spandrel Glass market, Spandrel glass is used to prevent materials or construction elements from being viewed from the exterior of a building. The primary function of spandrel glass is to cover non-visible areas including the areas between floors, hung ceiling areas, knee-wall areas below vision lights, and sometimes even columns or partitions.

Spandrel glass is designed to mask vision through the structural areas of a building such as between floors and columns. Spandrel glass is widely used in curtain wall projects, where it provides non-transparence with high safety and resistance to corrosion.

Spandrel glass must be heat treated to avoid thermal stress breakage. Solar Seal Spandrel Glass is lead-free and contains no organic solvents and can be handled at any stage without fear of personal or environmental harm.

Europe is the largest producer of Spandrel Glass, with a market share more than 25%, followed by North America and China. AGC, NSG Group, Guardian Glass, Saint-Gobain and Taiwan Glass are the top 5 manufacturers of Spandrel Glass market, and they had a more than 40% combined market share.
