### Description

SPC stands for Stone Polymer Composite, a limestone core combined with PVC dust and a stabilizer. As a result, it's denser due to the core being 60-70% limestone with a 30% PVC core fused together. Often referred to as rigid core, SPC is 10X more impact resistant than WPC. It's also more stable to sunlight, can be installed in sunrooms, and has better scratch resistance compared to WPC.

The industry is relatively fragmented and the main players are located in China and the United States. Decno Group, Armstrong, Mohawk, Mannington Mills, Tianzhen Bamboo Flooring, Zhejiang Oufei New Material, Zhejiang Walrus New Material and Zhejiang Kingdom are considered to be the main players in the industry. The Decno Group is considered to be the market leader with a 9% market share in sales.

### Report Scope

This report quantifies the global Stone Plastic Composite Flooring market in revenue (US\$ million) and, where applicable, sales volume (K Sq.m), using 2025 as the base year and providing annual historical and forecast data for 2021-2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Sq.m) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Stone Plastic Composite Flooring.

### Key Companies & Market Share Insights
