Description

Super tough nylon is an impact modified crystalline thermoplastic polyamide resin. The defining super tough nylon characteristic is superior resistance to repeated impact loads. This material maintains good tensile strength, chemical resistance, stiffness and flexural memory. They are for injection molding and extrusion and they offer outstanding impact resistance over a wide temperature and humidity range and high productivity. At present, the major manufacturers of super tough nylon are concentrated in DuPont, BASF, Ensinger, Unitika, Toray and Mitsubishi. DuPont is the world leader, holding 35% production market share.
