Description

Syndiotactic Polystyrene (or Syndiotactic Polystyrene, SPS) is a kind of crystal polystyrene engineering plastic which is different from normal polystyrene's in spatial structure. The structure of the product is regularly alternately spaced and it makes its properties different from normal polystyrene especially the resistance of heat and drug. Syndiotactic Polystyrene provides a good balance and competes well against other materials in a wide variety of applications.

Global Syndiotactic Polystyrene key players include Idemitsu Kosan, LG Chem, etc. Global top two players hold a share about 100%.

South Korea is the largest market, with a share about 25%, followed by Japan, having a share about 5 percent. In terms of product, Idemitsu Kosan Product is the largest segment, with a share about 75%. And in terms of application, the largest application is Electronic components, followed by Automotive, Membrane, Food and Medical container.

Report Scope

This report quantifies the global Syndiotactic Polystyrene market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Syndiotactic Polystyrene.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
