Description

Citral (C₁₀H₁₆O), also called 3,7-dimethyl-2,6-octadienal, a pale yellow liquid, with a strong lemon odour, that occurs in the essential oils of plants. It is insoluble in water but soluble in ethanol (ethyl alcohol), diethyl ether, and mineral oil. It is used in perfumes and flavourings and in the manufacture of other chemicals. Chemically, citral is a mixture of two aldehydes that have the same molecular formula but different structures.

In consumption market, Europe is the main consumption region due to the bigger demand of downstream applications.

Synthetic citral is mainly used in spices, vitamin, menthol and others. Report data showed that 10.23% of the synthetic citral market demand in spices, 66.52% in vitamin, and 18.96% in menthol in 2019. With the development of economy, these industries will need more synthetic citral. So, synthetic citral has a huge market potential in the future.
