Description

Synthetic paper, from its early development and historical evolution, has typically been manufactured using synthetic resin derived from petroleum as its primary material. Naturally, this has given it characteristics similar to those of plastic film, but its appearance is remarkably similar to that of regular paper made from wood pulp. In addition, many synthetic papers have properties similar to those of regular paper.

Global Synthetic Paper key players include Yupo, Nan Ya Plastics, Arjobex, Treofan Group, DowDuPont, etc. Global top five manufacturers hold a share over 85%.

Japan is the largest market, with a share over 25%, followed by North America and Asia (Ex. Japan), both have a share over 45%.

In terms of product, BOPP is the largest segment, with a share about 60%. And in terms of application, the largest application is Non-Label, followed by Label, etc.

Report Scope

This report quantifies the global Synthetic Paper market in revenue (US\$ million) and, where applicable, sales volume (K t), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K t) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Synthetic Paper.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
