Description

Tertiary amine is an amine that has the following general structural formula. In tertiary amines, nitrogen has three organic substituents. Examples include trimethylamine, which has a distinctively fishy smell, and EDTA. The use of tertiary amines is very extensive and is an important intermediate for the preparation of quaternary ammonium salts. It is widely used in the production of asphalt emulsifiers, chemical antistatic agents, foaming agents, oilfield demulsifiers, pesticide emulsifiers and fabric softeners.

Albemarle Corporation, Klk Oleo, Kao Group and Eastman are the key manufacturers of Tertiary Amines, with about 25% market shares. China is the largest producer of Tertiary Amines, with a production market share nearly 45%. India is the second largest producer of Tertiary Amines, enjoying production market share nearly 18%.

Report Scope

This report quantifies the global Tertiary Amines market in revenue (US\$ million) and, where applicable, sales volume (t), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/t) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Tertiary Amines.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
