Description

The TFL is a melamine-saturated décor paper that is thermally fused directly to the substrate such as MDF or particle board. Particleboard and MDF are ideal substrates for TFL because they are consistent, uniform in strength and free of defects.

Currently, Kronospan M&P Kaindl, TEEHOME, Swiss Krono Group, Roseburg, Arauco and Sonae Industria are major manufacturers of this industry. Kronospan M&P Kaindl is a leader of this industry, which held a share of 6%.

More than 70% of global melamine consumption is for laminates and wood adhesives production. Laminates are found in products such as furniture, floors, kitchen cabinets and countertops, and walls.
