Description

Thionyl chloride is also known as sulfur oxychloride. It is a colorless or light yellow transparent liquid, and with a pungent odor. Thionyl chloride dissolved in benzene, chloroform and carbon tetrachloride. It is an important inorganic chemical product.

The concentration of thionyl chloride industry is high, mainly in Germany, Switzerland, India and China. In the world wide, giant manufactures mainly distribute in China, which accounts for more than a half of the global production. Germany, Switzerland and India have a long history and unshakable status in this industry, like Lanxess, CABB and Transpek, both have perfect products.

Report Scope

This report quantifies the global Thionyl Chloride market in revenue (US\$ million) and, where applicable, sales volume (kt), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/kt) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Thionyl Chloride.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
