### Description

Cross-laminated timber (CLT) is a wood panel typically consisting of three, five, or seven layers of dimension lumber oriented at right angles to one another and then glued to form structural panels with exceptional strength, dimensional stability, and rigidity. CLT can be manufactured to customized dimensions and panel sizes vary by manufacturer while length is usually limited by transportation restrictions.

The major players in global Timber Plants market include Hasslacher Norica, Mayr-Melnhof Holz, Binderholz, etc. The top 3 players occupy about 15% shares of the global market. Europe is the main market, and occupies about 80% of the global market. Glulam is the main type, with a share about 80%. Residential Building is the main application, which holds a share about 45%.

### Report Scope
