Description

Toluenediisocyanate (TDI) is an organic compound with the formula $\text{CH}_3\text{C}_6\text{H}_3(\text{NCO})_2$. Two of the six possible isomers are commercially important: 2,4-TDI (CAS: 584-84-9) and 2,6-TDI (CAS: 91-08-7). 2,4-TDI is produced in the pure state, but TDI is often marketed as 80/20 and 65/35 mixtures of the 2,4 and 2,6 isomers respectively. It is produced on a large scale, accounting for more than 30% of the global isocyanate market, second only to MDI. All isomers of TDI are colorless, although commercial samples can appear yellow. Covestro, BASF, and Wanhua Chemical were the three biggest TDI manufacturers globally in 2018, with a market share of 22.47%, 22.76%, and 20.72% respectively. China had the largest production market share during the past few years, and it was also the largest consumption, but the consumption market share decreased from 2014 to 2018, while other regions increased.

Report Scope

This report quantifies the global Tolylenediisocyanate market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10). The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Tolylenediisocyanate.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
