Description

Transparent Acrylonitrile–butadiene–styrene, the most common product is MABS, is a clear engineering and commodity thermoplastic that has rubber particles dispersed throughout a methyl methacrylate-acrylonitrile styrene (MMA-SAN) polymer matrix. The incorporating of rubber particles into a MMA-SAN matrix and optimization of the composition results in a highly transparent polymer whereas conventional ABS is opaque. This amorphous, clear, transparent engineering and commodity thermoplastic has excellent transparency, high-impact strength, good stiffness and good resistance to many chemicals. It is also easy to process with standard equipment including extrusion and injection molding and can be easily colored.

Global Transparent ABS Plastics key players include Toray, Chimei Corp, LG Chem, Lotte Chemical, Ineos, etc. Global top 3 manufacturers hold a share about 76%.

Asia is the largest market, with a share about 90%, followed by Europe and North America, both have a share about 8 percent.

In terms of product, General Purpose Grade is the largest segment, with a share about 51%. And in terms of application, the largest application is Appliance Industry, followed by 3C Products.

Report Scope

This report quantifies the global Transparent ABS Plastics market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Transparent ABS Plastics.

Key Companies & Market Share Insights
