Description

Polyimide film is an electrical insulating material with very special properties and can therefore be used in a variety of ways. Polyimide (short: PI) is a thermoplastic synthetic substance for high-temperature applications. Colorless polyimides provide excellent thermo-mechanical properties, have high chemical resistance, and are also optically transparent.

Global Transparent Polyimide Film main manufacturers include MGC, Kolon Industries and SKC, totally accounting for 78% of the market. Asia Pacific is the largest market, with a share over 87%. As for the types of applications, it can be divided into Organic Light-emitting Diodes (OLEDs), Organic Photovoltaics (OPVs), Flexible Printed Circuit Boards (PCBs), Aerospace and others. The most common application is Organic Light-emitting Diodes (OLEDs), with a share over 79%. As for the types of products, it can be divided into thickness (more than 25 μm), thickness (15μm-25μm) and thickness (less than or equal to 15μm). The most common product is thickness (15μm-25μm), with a share over 69%.

Report Scope

This report quantifies the global Transparent Polyimide Film market in revenue (US\$ million) and, where applicable, sales volume (Sqm), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Sqm) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Transparent Polyimide Film.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
