### Description

A triazine is class of nitrogen-containing heterocycles. The parent molecules' molecular formula is C<sub>3</sub>H<sub>3</sub>N<sub>3</sub>. They exist in three isomeric forms, 1,3,5-triazines being common.

MMA Triazine is a cyclic tertiary triamine. It is mainly used as a scavenger for sour gases like H<sub>2</sub>S and mercaptans in gaseous or liquid hydrocarbon streams.

MEA-triazine is the most commonly used chemistry for applications requiring a non-regenerative H<sub>2</sub>S scavenger. Other chemistries are available (MMA-triazine, glyoxal, zinc-based, iron-based, and others) but MEA-triazine has the highest market share because it is the lowest cost in use solution. Triazines are low cost in use despite the fact that the molar efficiency of the chemistry in capturing H<sub>2</sub>S is significantly below theoretical maximum efficiency.

North America is the major market for triazine, accounting for over 40% of the market share. Europe is next with about 25%.

Hexion, Eastman, Baker Hughes, Sintez Oka and others are the major players, with the top three accounting for about 20% of the market.

### Report Scope

This report quantifies the global Triazine market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Triazine.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
