Description

Trimethylolpropane is a trifunctional alcohol with a wide spectrum of applications in the chemical industry, e.g. for the synthesis of alkyd and polyester resins, synthetic lubricants, PU-foams and lacquers or glues and adhesives. Furthermore, trimethylol propane is used for the production of dyestuffs, pigments, paints and silicone products.

Global Trimethylolpropane (TMP) key players include Perstorp, Lanxess, Oxea, etc. Global top three manufacturers hold a share about 55%.

Europe is the largest market, with a share over 25%, followed by China, and USA, both have a share over 50 percent.

In terms of product, Sodium Formate Method is the largest segment, with a share nearly 90%. And in terms of application, the largest application is Coating Pigment, followed by Plastic Additives, Synthetic Lubricants, etc.

Report Scope

This report quantifies the global Trimethylolpropane (TMP) market in revenue (US\$ million) and, where applicable, sales volume (K MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Trimethylolpropane (TMP).

Key Companies & Market Share Insights
