Description

PVAc emulsions are best known for their use in wood glues or school glues due to their strong adhesion properties. Applications include coatings, corrugate, paper, printing, wood processing, medium-density fiberboard (MDF), construction, packaging, adhesive and heat-sealing applications. They bond with a variety of substrates, including wood, cloth, paper, or other porous materials.

Vinyl acetate homopolymer emulsion is mainly used in waterborne adhesives, nonwovens, paper and board coatings and carpet backings. The US is the world's largest market. The main companies are Henkal, Vinavil, H.B. Fuller and so on
