Description

Molecular Formula of Vinylcyclohexane (CAS 695-12-5) is C₈H₁₄. Currently, due to high production cost, scaled commercial production of Vinylcyclohexane has not been realized. In research activities, Vinyl cyclohexane is primarily used in the chemical and polymer industry due to its unique set of properties. For instance, vinyl cyclohexane-based polymers with isotactic configuration has a high melting point and are excellent in heat resistance, which can be prepared by polymerizing vinyl cyclohexane in the presence of a Ziegler-Natta catalyst.

The Vinylcyclohexane (CAS 695-12-5) market covers Purity 98%, Purity 97%, etc. The typical players include Merck, TCI, Santa Cruz Biotechnology, Norquay Technology, BOC Sciences, etc.

The major players in global Vinylcyclohexane (CAS 695-12-5) market include Merck, TCI, Norquay Technology, etc. The top 3 players occupy about 60% shares of the global market. North America and Asia-Pacific are main markets, they occupy about 75% of the global market. Purity 98% is the main type, with a share about 40%. Chemical is the main application, which holds a share about 55%.

Report Scope

This report quantifies the global Vinylcyclohexane market in revenue (US\$ million) and, where applicable, sales volume (MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/MT) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Vinylcyclohexane.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
