Description

White cement is a powdery material which hardens when mixed with water. It serves as binder for natural and artificially processed aggregates, such as sand and gravel, for production of mortar, plaster and concrete. White cement has essentially the same properties as grey cement, except for color. The whiteness of the cement depends on the raw materials and the manufacturing process. It is the metal oxides primarily iron and manganese that influence the whiteness and undertone of cement.

Asia is the largest market segment of White Portland Cements, with a consumption market share nearly 41.66% in 2018, followed by Middle East with a consumption market share nearly 21.97% in 2018. In the industry, Cementir Holding has the large revenue market share in 2018, while Cimsa (including Cemex) and Dyckerhoff ranked 2 and 3. The market share of them is 21.25%, 11.62% and 5.91% in 2018. The gap of market share is keep on enlarged due to different strategy.
