Description

Woven wire mesh is made in a similar fashion to woven fabrics, as it is woven on looms. Wires are woven together to create wire mesh in different patterns, such as plain weave and twilled weave.

The woven wire mesh market is highly fragmented. The top 20 players only held about 12.2% of the market share, in terms of the globe revenue in 2018.

Report Scope

This report quantifies the global Woven Wire Mesh market in revenue (US\$ million) and, where applicable, sales volume (M Sqm), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/M Sqm) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Woven Wire Mesh.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
