Description

Zirconium oxide (also known as zirconia or as zirconic anhydride, ZrO₂) is a toxic white powder that is insoluble in water but soluble in mineral acids. Its most naturally occurring form, with a monoclinic crystalline structure, is the mineral baddeleyite. The dopant stabilized cubic structured zirconia, which is synthesized in various colors, is mainly used as a gemstone and a diamond simulant.

Global Zirconium Oxide key players include Imerys, Bengbu Zhongheng, Saint-Gobain, Sanxiang Advanced Materials, Zhenzhong Fused Zirconia, etc. Global top five manufacturers hold a share over 55%.

China is the largest market, with a share over 75%, followed by Europe and Japan, both have a share over 10%. In terms of product, Chemical Zirconium Oxide is the largest segment, with a share over 65%. And in terms of application, the largest application is Refractory, followed by Metallurgy, Ceramic, etc.

Report Scope

This report quantifies the global Zirconium Oxide market in revenue (US\$ million) and, where applicable, sales volume (Ton), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Ton) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Zirconium Oxide.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
