Description

POS Printers refer to POS receipt printers. A POS receipt printer is a device that prints a receipt for customers at the point a transaction occurs. POS printers are an important part of a point of sale (POS) system. Receipt printers are an integral part of each restaurant or retail stores' point of sale (POS) system. In order to process payments, businesses need this technology to print credit card slips, print customer receipts and send orders to the kitchen or bar area.

There are major two types of POS printers in the market, desktop printer and mobile printer, among them, desktop POS printers took a bigger share of 75.38% in 2019.
