### Description

Shower cap is simply a covering used over the head to keep hair dry when showering or engaging in some other type of activity involving water. Shower caps can be made of several different materials. No matter what material is used, they all have something in common -- their ability to repel water and provide an impermeable layer between the outside of the shower cap and the scalp.

The most common reason for the use of a shower cap is so that an individual can keep hair dry while taking a shower or, to a lesser extent, a bath. Predominately used by women, there are a number of reasons why one may choose to take advantage of a shower cap to keep hair dry. For example, if showering shortly before going to bed, some may prefer not to take the time to dry their hair. Rather than going to bed with wet hair, a shower cap can be a convenient alternative.

In addition to the practical use of keeping hair dry, a shower cap can also help protect your hair. In some cases, a woman may have a specialized hairdo that would be ruined if it got too wet. If not ruined completely, a hairdo may require considerable work to restore once it is wet. Keeping the hair dry is a can be a tremendous time-saving mechanism, and cost savings mechanism, in such cases.
