Description

Smartphone Cover Glass is usually aluminum silicate material. With screen sizes increasing, smartphones continue to lead total area demand in the cover glass market; however, as the markets for smartphones and tablets mature, cover glass industry revenue growth is declining from 39 percent year over year in 2013 to around 10 percent in 2017. While the overall cover glass market growth is falling, increasing popularity of the Apple Watch is leading to growth in smart watch cover glass shipments.

The Asia-Pacific region is the leading market for smartphone cover glass, accounting for more than 95% of the market.

Corning, AGC and NEG are the main manufacturers. Corning is the world's largest, with about 70% of the market.

Report Scope

This report quantifies the global Smartphone Cover Glass market in terms of revenue (US\$ million) and, where applicable, sales volume (K Sqm), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of Types and Applications, harmonizes vendor attribution, and presents comparable time series by company, Type, Application, and region/country, including indicative price bands (US\$/K Sqm) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for brand owners, manufacturers, retailers, channel partners, and investors; data are structured with consistent units and fields to facilitate integration into internal FP&A and BI systems.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
