### Description

Stadium seating is a characteristic seating arrangement that is most commonly associated with performing-arts venues, and derives its name from stadiums, which typically use this arrangement. In stadium seating, most or all seats are placed higher than the seats immediately in front of them so that the occupants of further-back seats have less of their views blocked by those further forward. This is especially necessary in stadiums where the subject matter is typically best observed from above, rather than in-line or from below.

Global key players of Stadium Seats and Cushions include Kotobuki Seating, Hussey, Avant, RECARO and Camatic Seating, etc. Top five players occupy for a share about 39%. North America is the largest market, with a share about 32%, followed by Asia-Pacific and Europe. In terms of material, Seats is the largest segment, with a share over 90%. In terms of application, Open-air Stadium is the largest market, with a share over 64%.
