### Description

A window blind is a type of window covering. There are many different kinds of window blinds which use a variety of control systems. A typical window blind is made up of several long horizontal or vertical slats of various types of hard material, including wood, plastic or metal which are held together by cords that run through the blind slats. Window blinds can be maneuvered with either a manual or remote control by rotating them from an open position, with slats spaced out, to a closed position where slats overlap and block out most of the light.

The technical barriers of Window Blinds are relatively low, resulting in numerous manufacturing enterprises. In the market, there are some relatively large enterprises, such as Hunter Douglas, Springs Window Fashions, Nien Made Enterprise, Hillarys, TOSO, Tachikawa Corporation, Ching Feng Home Fashions, Nichibei. The top 5 are Springs Window Fashions, Hunter Douglas, Nien Made, TOSO and Tachikawa Corporation, with about 30% market shares.

North America is the largest consumption place, with a consumption market share nearly 30%. Following North America, Europe is the second largest consumption place with the consumption market share of 27%.
