Description

IR filter commonly refer to filters that reflect or block mid-infrared wavelengths while passing visible light. The infrared filter exists in various specifications and forms for a multitude of applications. Infrared filters can be designed in bandpass, longpass, and shortpass configurations for applications in the SWIR, NIR, and MIR wavelength bands. Low stress coatings with high blocking in the visible are afforded by incorporating high index semiconductors in the designs.

Global Infrared Filters key players include Zhejiang Quartz Crystal Optoelectronic, Optrontec, W-olf Photoelectric, Shenzhen O-film Tech Co, Tanaka Engineering Inc etc. Global top five manufacturers hold a share over 40%.

China is the largest market, with a share over 40%, followed by USA and South Asia, both have a share over 20% percent.

In terms of product, Blue Glass Infrared Filter is the largest segment, with a share over 40%. And in terms of application, the largest application is Mobile Phone followed by Tablet and Notebook.
