Description

Strain Gage Based Sensor measures the strain (displacement) of an object under an applied force. When they are adhesively attached to the object under stress (an applied force), they deform with the object. The magnitude of the applied stress can be inferred from changes in the gauge's electrical resistance due to its deformation.

Global Strain Gage key players include Vishay, HBM, Mettler-Toledo, Flintec, Minebea, etc. China and USA is the largest market, both with a share about 30%, followed by Europe, with a share about 25 percent. In terms of product, Alloy steel sensor is the largest segment, with a share about 50%. And in terms of application, the largest application is Industrial Measurement and Control, followed by Automobile Comprehensive Performance Testing, Commercial Weighing, etc.

Report Scope

This report quantifies the global Strain Gage market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Strain Gage.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
